

## Rhode Island

EnviroBlend® has extensive knowledge of the fate and transport of heavy metal contamination, as well as remedial action experience. Our scientists have spent years developing cost-effective chemistries for rendering lead, cadmium, arsenic, hexavalent chromium, zinc and other heavy metal contaminants non-hazardous. This research has resulted in a number of patented products that have been widely applied for heavy metal remediation sites across the country.

### ***Property Development Corporation – Rhode Island***

Treated 750 tons of arsenic-impacted soil using conventional construction equipment. Treated material was used for on-site backfill.
